

## **INSTRUCTIONS**

1. The exam paper will be featuring both objective and descriptive type of questions covering the syllabus of FIRST three units.
  2. Exchange of calculator is NOT allowed.
  3. You have to answer every question on a new page. But, each sub-section of a question has to be answered on the same page only.
  4. While answering the objective part of the question paper don't use any short forms. Answer the objective part in CAPITAL letters and in FULL WORD only. There has to be sufficient space between two objective answers. Don't put one answer after another in a compressed manner. Give the spacing properly.
  5. In case of any calculative part, show your calculations in your answer book at the same place, and write the answer in proper way so that it can be noticed. For such questions, you can use the headings like Answer = or show it in a box.
- Else the examiner has to trace your answer.
5. Attempt the paper in sequence.
  6. Simply writing the answer only referring the presentation slides in the bullet points format without any relevant explanation is not expected/adopted. You should explain/elaborate your answer for descriptive questions.

Read the above instructions, no excuse will be entertained that you were not aware of the above.

Best wishes,

Dr. S. Bagchi
